

Katherine Blackmon
Major: Pre-engineering
Home Town: Barnesville
High School: Spalding High School

Brief Bio:

I graduated from Spalding High School in June of 2014 with honors. I came to Gordon not sure of what major I wanted to pursue. I have always been interested in the medical field and in helping others. My senior year of high school I was a part of a general medicine class, which gave me the opportunity to job shadow at the Griffin hospital. This opened my eyes to the world of medicine and different medical careers. After this experience, I decided I wanted to still work in the medical field but find a career without having to work with patients. Biomedical engineering caught my attention and I began to research more into this career. I have now decided to complete my associate's degree at Gordon in pre-engineering and then to transfer to Georgia Tech to receive my bachelor's in biomedical engineering. I am excited about where this degree could take my life and all of the possibilities of my future.
