Over twenty years of work experience as an FMIS professional and a DBA.

When I applied to Gordon, my application was denied. I love telling this story! I came to take the Compass and Mr. Ferguson informed me that my application was denied. I wasn't what Gordon was looking for on paper. Now here is what I love about my college. I walked the campus and met the members of the Admission Committee who were here. I explained my journey to college, and I promised that if I were given a chance I would make each and every one of them glad that they gave me a chance. I took the Compass and by the time I arrived in Atlanta that evening, Mr. Ferguson called to say that I would be accepted (albeit on probationary status). I obtained a 4.0 G.P.A the first semester and remained on the Dean's List ever since. I have been at Gordon for one year and I graduate May 2015 with my BS in Human Services. I am now applying to a neuroscience graduate program in Idaho.

I will enter the forensic psychiatric field, because I know that the incarcerated don't look valuable on paper, but oh what promise there is there. They need someone to take a second look; who knows more about that than me?
