

Justin Serna

A.S. in Chemistry, May 2016

Hometown: Griffin, GA

High School: Griffin High School

Honors:

Dean's List- Fall 2014

Brief Bio:

Gordon State College never really was my ideal college to go to. Ideally, I wanted to go to a larger and more well-known institution that offered exactly what I needed, and had a great Chemistry department. Eventually, however, Gordon State became a potential college, and, well, as it can be seen, I chose Gordon State as my first choice. I came here aimed at only staying a year so that I could get my basic courses out of the way and transfer to another college or university. I discovered, however, that Gordon has a lot more to offer than what I expected. I discovered that GSC is a great place for any new college student to begin their journey, because of the many great professors available and the great atmosphere GSC provides to students. Looking back, I am ecstatic that I chose to attend Gordon State College. GSC has allowed me to start my journey in becoming a Forensic Scientist and has provided me with essential tools that I will use after I bid adieu to the campus and all those that have helped me since the start.

Currently in my second semester at GSC, I am a major of Chemistry with hopes to earn a bachelor's elsewhere in Chemistry, and, eventually, earn a Master's in Chemistry or a specific concentration within Forensic Science. My strongest subjects include mathematics and science. My favorite pastimes involve musical theatre, music, and culinary arts.
